

# Priority Invasive Weeds of the Lake Tahoe Basin

## Lake Tahoe Basin Weeds Coordinating Group

Revised December 2007

This list, prepared by the Lake Tahoe Basin Weeds Coordinating Group, is updated annually. It is utilized by the group and stakeholders as a guide in evaluating annual action plans, treatment protocols and new project proposals.

### **Group 1 Species: Watch For, Report, and Eradicate Immediately:**

These species are:

- a) Not currently present in the Lake Tahoe Basin and are documented in areas adjacent to the basin where potential for introduction is high OR
- b) Present only as small, eradicable populations.

The letter following each species in Group 1 denotes the infestation type as detailed above. Aggressive treatment will be pursued when these species are found. Educational programs will target early detection and reporting of these species.

1. Canada thistle (*Cirsium arvense*) – b
2. Diffuse knapweed (*Centaurea diffusa*) - b
3. Hoary cress (*Cardaria* species) – b
4. Musk thistle (*Carduus nutans*) - a
5. Rush skeletonweed (*Chondrilla juncea*) - b
6. Russian knapweed (*Centaurea repens*) - b
7. Scotch thistle (*Onopordum acanthium*) – a
8. Squarrose knapweed (*Centaurea virgata* Lam. ssp. *squarrosa*) – b
9. Sulfur cinquefoil (*Potentilla recta*) - b
10. Teasel (*Dipsacus fullonum*) - b
11. Yellow starthistle (*Centaurea solstitialis*) - b

### **Group 2 Species: Manage Infestations With a Goal of Eradication**

Encourage the management/control of populations of these species to prevent further spread in the Lake Tahoe Basin. Isolated populations will be targeted for eradication.

12. Bull thistle (*Cirsium vulgare*)
13. Curlyleaf pondweed (*Potamogeton crispus*)
14. Dalmatian toadflax (*Linaria dalmatica*)
15. Eurasian watermilfoil (*Myriophyllum spicatum*)
16. Klamathweed (*Hypericum perforatum*)
17. Oxeye daisy (*Chrysanthemum leucanthemum*)
18. Perennial pepperweed (*Lepidium latifolium*)
19. Scotch broom (*Cytisus scoparius*)
20. Spotted knapweed (*Centaurea biebersteinii*)
21. Yellow toadflax (*Linaria vulgaris*)
